

SMARTFORK[®]

The intelligent sensor fork.

VETTER[®]
Solutions

reasons to use the SmartFork® in your logistics:

1. **Higher level of safety:**
For staff and goods
2. **Reduced damages:**
Through improved visibility and intelligent sensor technology
3. **Reduced costs:**
Through less damage to goods and packaging
4. **Better ergonomics:**
Full visibility without uncomfortable rotation of the head and the upper body
5. **Save time:**
Through safe navigation when transporting goods and faster workflows
6. **Easy handling:**
Intelligent sensor integrated in the forks makes your work easier

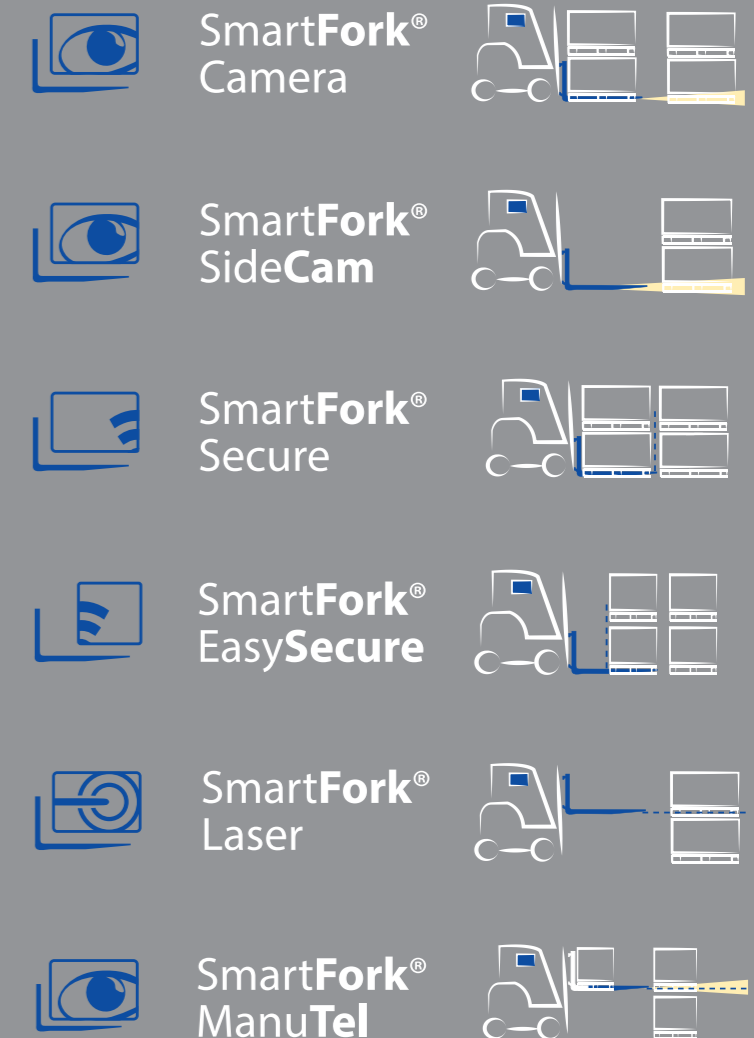

These are commercial representations of principles that do not form a contractual basis or guarantee services. As an assistance system, SmartFork® does not release you from due diligence and personal responsibility during the assignment.

The SmartFork® applications

Each SmartFork® application is clever. But only in combination they form an intelligent overall solution that guarantees more safety and efficiency. With the smart assistance system, your goods can safely be transported from A to B – without transport damage, but with forward visibility.

Further advantages:

SmartFork® can be installed on all available industrial trucks, on request also with radio transmission.

Intuition meets precision – in one tool, making work with a fork more efficient, more accurate and safer than ever before.

I SPY WITH
MY LITTLE EYE....!

- ▶ Extension of your field of vision
- ▶ Sighting of carriers
- ▶ Safe loading
- ▶ Detecting obstacles when the load is picked up

SmartFork®
Camera

PRECISE, CLEVER
AND SAFE!

SmartFork®
SideCam

Optional:

SmartFork®
Laser

- ▶ Easy and safe retraction in pallets
- ▶ Improved lifting of loads
- ▶ Both forks in the camera field of view
- ▶ Reduction of accidents with physical injuries

- ▶ Unique: Semi-integrated camera installation (approx. 60% lower installation height compared to other brands)
- ▶ Robust camera installation - No risk of being torn off
- ▶ Plug & Play: Hook in fork, connect plug, DONE!
- ▶ Cable routing integrated into the fork for protection against damage

HIGH UP AND
EVERYTHING UNDER CONTROL!

NEVER AGAIN OVER-
SHOOT THE MARK!

SmartFork®
EasySecure

- ▶ Safe load absorption in block storage, even in vast heights
- ▶ Safe recognition of transverse or longitudinal stored pallets
- ▶ Up to three firmly defined pallets can be picked up and stored independently

SmartFork®
Secure

- ▶ Safe loading in block storage
- ▶ Easy recognition of the end of a pallet
- ▶ No danger to lift up the pallet stored next in line, too

EasySecure
